

FOR COLLABORATION & COMMUNICATION

Ekiga - <http://www.ekiga.org/>

Ekiga, available for Windows, Linux and Macintosh platforms, is a videoconferencing and instant messaging tool similar to Skype, but which uses open standards such as H.323 and SIP for communication.

Asterisk - <http://www.asterisk.org/>

Asterisk is software aimed at telecommunications professionals which enables you to turn your computer into a voice communications server, using voice over internet protocol (VoIP). For advanced users only.

E-Groupware <http://www.egroupware.org/>

E-Groupware is a suite of community-developed software packages aimed at team collaboration. The suite includes email, calendar, to-do list, document manager, wiki, knowledge base and timesheet. It requires some advanced systems administration skills for installation.
